◆ RegQuery

EU Regulatory Intelligence Agent

Ask any **DORA · NIS2 · GDPR · EU AI Act** question → grounded answer, **exact citations**, point-in-time accuracy, human-approved write-back.

Gemini 3 | Google Cloud Agent Builder | MongoDB Atlas Vector Search

THE PROBLEM

One compliance question = ~47 minutes today

- Open a 300-page regulation PDF, ctrl-F, cross-check NIS2 / GDPR.
- A generic chatbot **hallucinates article numbers** — fatal in compliance.
- It only knows **today's** rules — not what applied when the incident happened.

THE SOLUTION · ~8 SECONDS

A multi-step agent, not a chatbot

1. Embed the question · Vertex text-embedding-004
2. Retrieve real article text · MongoDB Atlas $vectorSearch
3. Gate — abstain if unsure · no hallucinated law
4. Synthesize cited answer + obligations · Gemini 3.5
5. Propose a write-back · human approves · audited

THE SUPERPOWER

Point-in-time: the rule as it was in force

> "What was the DORA major-incident threshold on **2026-03-01**?" → returns the **historical** version (v1, 10%, eff 2025-01-17) — not today's (v2, 8%, eff 2026-07-01).

This is the exact question an auditor asks.

No generic chatbot can do this.

DIFFERENTIATORS

Built for trust

Point-in-time
Version-aware corpus, "as of" any date.

Calibrated abstention
Refuses + escalates below a confidence threshold.

Cross-regulation overlap
Reconciles DORA ↔ NIS2 conflicts.

Obligation ledger + audit
Structured, exportable CSV, immutable trail.

Human-in-the-loop
No write without an Approve click.

Judge Mode
A 90-second self-driving demo.

TECH & ARCHITECTURE

The required stack, used for real

- **Gemini 3.5-flash** (AI Studio) — reasoning & synthesis
- **Google Cloud Agent Builder** + **MongoDB MCP** — orchestration + human approval
- **MongoDB Atlas Vector Search** — 768-dim cosine retrieval, point-in-time filters
- **Vertex AI** embeddings · **Cloud Run** + Secret Manager hosting

Read-only steps run automatically; consequential writes are gated on human approval.

PROOF

It works — live & measured

100%

grounded eval — 6/6 golden cases, incl. correct abstention

✅ **Live on Cloud Run**

real Atlas + real Gemini 3.5

✅ **Judge Mode**

maps each beat to the judging criteria

◆ RegQuery

Grounded. Time-aware. Human-gated. Auditable.

EU rules · EU data · **in your control.**
